## a calm environment with support to guide

supportive housing to  
help transitioning tenants  
stabilize their lives and  
reconnect with the  
community

This project has been designed as a calm, warm residence for those on the supportive/transitional housing path in Quesnel. The strong connection to the outdoors was another design focus. There are 32 suites with a maximum of 36 beds of which 8 beds will support those the most in need. In addition to the residences, there are also offices, a communal dining hall, kitchen, and adjoining the dining hall there is an outdoor patio nestled into the trees and hillside.
