Under Construction

**a new office  
for an essential  
community  
support**

serving those with  
diverse abilities

This project is home to the main offices of Bethesda Christian Association. Bethesda Christian Association was founded in 1971 to support diverse abilities that fit to a person's intellectual, social, medical, emotional, spiritual, legal, and recreational needs. The ground level is home to Adult Day Program for the community Bethesda serves. Bright, private offices along with collaboration space occupy the second level. A simple, easily identifiable design is critical to this office which is reinforced with this two-floor scheme. Aesthetically, this project is interwoven into Abbotsford's modern design with the bold exterior sunshades and crisp brick and metal cladding.
