Complete April 2020

key features

Integration into the original school while highlighting key architectural components

Corridor collaboration space has been created on both floors for students

Sliding glass wall opens from interior common space to outdoor learning patio

growing with the community

expanding learning opportunities inside and out

The Pacific Heights neighbourhood in Surrey is rapidly developing. To accommodate a growing influx of students, SOA created a 2-storey addition to the existing, uniquely designed school. Blending seamlessly with the original school, the addition highlights several architectural details to create visual and learning interest for students and community alike.
