## location

10241 Bottom Wood Lake Rd,  
Lake Country

## size

1,001 m<sup>2</sup>

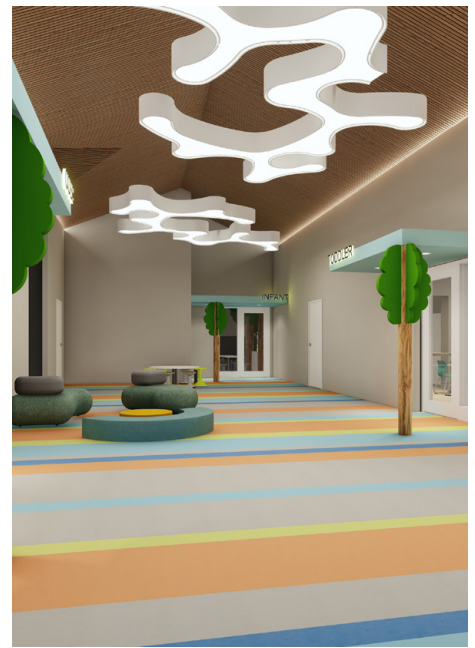

## value

\$2 million

## status

Design Development

With an existing single story 1,001 m<sup>2</sup> facility, an additional 98 sm is being added accompanied by a renovation of the existing facility to provide an open concept and interactive daycare. The daycare features an infant area with nap rooms, and a toddler area. The interior designed space also provides out of school care, an updated kitchen area, offices, laundry, 2 learning studios, and a community room. In connecting to the exterior, the daycare boasts playful round windows and new glazing, along with a curtain wall made of metal and laminate phenolic cladding. Ready for adventure, the play area outdoors includes a fire station play structure, a tire swing, an animal springer, and a Hedra® play structure made for climbing and sliding.
