

pineview valley elementary school

client

School District No. 73
(Kamloops-Thompson)

location

Kamloops

size

3,700m²

value

\$60 million

status

Under construction. Est. complete
fall 2026

key features

Neighbourhood Learning Centre

Greenhouse gas reduction
strategies

Mass timber elements

designed for the future

a climate-resilient,
sustainable new school

Located on a steeply sloping site in Kamloops' Pineview Valley neighbourhood, the new Pineview Valley Elementary School will provide 485 spaces for K-7 students.

The two-storey school design will feature concrete and steel on the first floor and mass timber on the second floor. An onsite Neighbourhood Learning Centre will provide childcare spaces. In addition to incorporating leading greenhouse gas reduction strategies, the climate-resilient design will help keep the building cool during extreme heat.

Community engagement has provided valuable learning opportunities for our team as we discuss how to incorporate Indigenous perspectives and outdoor spaces into the design. Other considerations for our team include maximizing the potential of the sloping site to enhance learning environments.
