

smiling creek elementary school

beyond the trees: sustainable design
on a sloped site

Smiling Creek Elementary, an adaptation of Richard Bulpitt Elementary on a steep and densely wooded site, involved extensive submissions to the City of Coquitlam by Station One Architects.

The modified school accommodates 430 students, featuring classrooms, a sports court, soccer field, outdoor washrooms, and a shared multi-purpose room with a kitchen.

CLIENT

School District No. 43
(Coquitlam)
